Cognicert Course Handbook

A detailed guide to professional learning pathways for auditors, implementers, assessors and operational leaders

122 course pathways
12 specialist areas | Four delivery options | Direct links to live course details

Catalogue snapshot 2 November 2026. Confirm current dates, fees, levels and assessment arrangements on the live course page before enrolment.

Using this handbook

This handbook is designed as a practical selection guide. Begin with the professional outcome you need, choose the relevant specialist area, then compare course profiles. Every underlined course title links to the current Cognicert course page.

01 Define the outcome
Decide whether you need implementation, audit, assessment, management or specialist operational capability.

02 Choose the level
Compare foundation, internal auditor, lead implementer, lead auditor, lead assessor or professional-role options where available.

03 Select delivery
Balance interaction, flexibility, team needs and timing across live-online, self-study, classroom and onsite formats.

04 Verify details
Use the linked course page for the current syllabus, prerequisites, duration, fee, dates and assessment information.

Delivery formats

Live online	Instructor-led learning with scheduled sessions and peer interaction.
Self-study	Flexible, on-demand learning for independent progress where offered.
Classroom	Face-to-face delivery at confirmed locations and dates.
Onsite	Organisation-specific delivery arranged for teams and operational contexts.

Understanding course levels

Course titles and levels indicate the capability being developed. Exact prerequisites, duration and assessment vary by course and should be checked on the live page.

Foundation or awareness	Build shared understanding of principles, terminology and system purpose.
Internal auditor	Prepare to plan, conduct and report internal audits within an organisation.
Lead implementer	Develop the ability to establish, operate and improve a management system or programme.
Lead auditor	Develop advanced audit planning, team leadership, evidence evaluation and reporting capability.
Lead assessor or verifier	Focus on conformity assessment, competence evaluation, impartiality and verification evidence.
Professional role course	Build applied capability for a named operational or management responsibility.

Training and certification are different

Training develops knowledge and skills. A training completion record or course certificate does not by itself constitute professional certification or management-system certification. Individual professional certification depends on the applicable scheme and may require training, examination, experience and continuing competence. Organisational certification involves application review, audit, corrective action and an independent certification decision.

Specialist areas at a glance

01	Continuity, Resilience and Recovery Build the capability to anticipate disruption, coordinate a controlled response and restore priority operations.	6 courses
02	Governance, Risks and Compliance Strengthen oversight, risk-informed decision making, compliance controls and independent assurance.	10 courses
03	Healthcare, Health and Safety Improve workplace and healthcare risk controls while supporting safer, more reliable services.	10 courses
04	Hospitality Apply structured service-quality practices to hotel operations and the guest experience.	1 courses
05	Human Resources Connect people, competence, knowledge and workforce data to organisational performance.	7 courses
06	Information Security and Data Privacy Develop governance, risk, assurance and incident capabilities for information, cyber and privacy programmes.	7 courses
07	Maritime Support safer ships, secure ports and effective ship-shore management through recognised maritime practices.	6 courses
08	Quality Management Build systems that deliver consistent outputs, reliable evidence and sustained improvement across sectors.	25 courses
09	Security Develop operational, information, privacy and supply-chain security capability across complex environments.	13 courses
10	Supply Chain Improve supplier, logistics, procurement and distribution decisions across connected value chains.	13 courses
11	Sustainability and Environment Turn environmental and social commitments into measurable management practices and credible evidence.	17 courses
12	Welding, Asset & Facility Management Improve technical coordination, asset lifecycle decisions and facility-service performance.	7 courses

Chapter 01

Continuity, Resilience and Recovery

Build the capability to anticipate disruption, coordinate a controlled response and restore priority operations.

Who this pathway serves
Continuity leaders, incident managers, emergency planners, operational risk teams.

Capabilities you can develop
- Business impact and continuity planning
- Crisis and emergency coordination
- Incident response, exercising and recovery

This chapter contains 6 course pathways. The detailed course profiles follow on the next page.

Chapter 01

Continuity, Resilience and Recovery Course profiles

Courses 1 to 6 of 6. Click an underlined title for the current course page.

Cognicert Business Continuity and Resilience Manager

Identify critical operations and supplier dependencies, set recovery priorities and practise coordinated responses to disruption.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Crisis Management Professional Course

Prepare crisis roles, coordinate leadership decisions and practise internal and media communications during disruption.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Emergency Response Manager Course

Organise response roles, operational information and communications, then use exercises to review emergency readiness.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert ISO/IEC 27035 Information Security Incident Manager Course

Apply information security incident management techniques to incident preparation, response coordination and lessons learned and use the results to inform workplace decisions.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

ISO 22301

Understand business continuity management system requirements, business impact analysis, response planning and exercising.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 27031 ICT Disaster Recovery Manager

Apply ICT disaster recovery techniques to ICT dependencies, recovery priorities and readiness exercises and use the results to inform workplace decisions.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Chapter 02

Governance, Risks and Compliance

Strengthen oversight, risk-informed decision making, compliance controls and independent assurance.

Who this pathway serves
Board advisers, risk and compliance managers, auditors, governance professionals.

Capabilities you can develop
- Governance roles and accountability
- Risk assessment and treatment
- Compliance monitoring and audit evidence

This chapter contains 10 course pathways. The detailed course profiles follow on the next page.

Chapter 02

Governance, Risks and Compliance Course profiles 1

Courses 1 to 6 of 10. Click an underlined title for the current course page.

Cognicert AI-Enhanced Auditor

Use AI to support audit planning, analyse evidence and draft reports while checking outputs and preserving professional judgement.

Best for Auditors and assurance professionals

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Auditing and Internal Control Professional

Plan risk-based audits, evaluate internal controls and communicate findings that support practical improvements.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Compliance Management Professional

Identify compliance obligations, assess risks and organise controls, monitoring and reporting across your organisation.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Corporate Governance Professional

Clarify board responsibilities, strengthen oversight and develop governance policies, reporting and controls.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Corporate Governance System Auditor

Plan governance audits, evaluate evidence and report findings on responsibilities, controls and corrective action.

Best for Auditors and assurance professionals

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert ISO 31000 Risk Manager

Apply risk management techniques to risk identification, evaluation and treatment decisions and use the results to inform workplace decisions.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Chapter 02

Governance, Risks and Compliance Course profiles 2

Courses 7 to 10 of 10. Click an underlined title for the current course page.

ISO 37001

Develop practical capabilities in anti-bribery management, including bribery risks, due diligence and control evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 37002

Develop practical capabilities in whistleblowing management, including reporting channels, case handling and impartial oversight.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 37003

Develop practical capabilities in fraud control, including fraud risks, preventive controls and response evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 37301

Develop practical capabilities in compliance management, including compliance obligations, risk controls and monitoring.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 03

Healthcare, Health and Safety

Improve workplace and healthcare risk controls while supporting safer, more reliable services.

Who this pathway serves
HSE practitioners, healthcare quality teams, process-safety and assurance professionals.

Capabilities you can develop
- Hazard identification and risk control
- Healthcare quality and patient-centred systems
- Safety auditing, investigation and improvement

This chapter contains 10 course pathways. The detailed course profiles follow on the next page.

Chapter 03

Healthcare, Health and Safety Course profiles 1

Courses 1 to 6 of 10. Click an underlined title for the current course page.

Cognicert Chemical Management Professional Course

Identify chemical hazards, organise safe handling and storage, and prepare controls for spills and waste.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

HACCP Lead Assessor

Compare training levels, study options and course details in one place.

Best for Assessors, verifiers and conformity professionals

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Cognicert HSE Level 1, 2 & 3 Professional Certification Programme

Progress from recognising workplace hazards to assessing risks, investigating incidents and leading HSE improvements.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Healthcare Quality Risk Manager Course

Identify healthcare quality risks, evaluate clinical-process controls and plan actions that support patient-centred improvement.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Hazard and Operability Analysis Professional

Apply HAZOP guidewords, identify process deviations and document hazards, safeguards and follow-up actions.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

ISO 22000

Understand food safety management system requirements, food-chain responsibilities, hazard control and audit evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 03

Healthcare, Health and Safety Course profiles 2

Courses 7 to 10 of 10. Click an underlined title for the current course page.

ISO 39001

Develop practical capabilities in road traffic safety, including road-safety risks, performance measures and preventive controls.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 45001

Understand health and safety management system requirements, workplace hazards, worker participation and audit evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 45003

Develop practical capabilities in psychosocial risk management, including psychosocial hazards, workplace controls and worker participation.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 7101

Understand healthcare organization management, patient-centred quality, clinical risk and service improvement.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 04

Hospitality

Apply structured service-quality practices to hotel operations and the guest experience.

Who this pathway serves
Hotel managers, quality leaders, service auditors and hospitality consultants.

Capabilities you can develop
- Guest needs and service processes
- Consistent operating controls
- Service measurement and improvement

This chapter contains 1 course pathways. The detailed course profiles follow on the next page.

Chapter 04

Hospitality Course profiles

Courses 1 to 1 of 1. Click an underlined title for the current course page.

ISO 22483

Develop practical capabilities in hotel service quality, including service processes, guest needs and quality improvement.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 05

Human Resources

Connect people, competence, knowledge and workforce data to organisational performance.

Who this pathway serves
HR leaders, learning professionals, people analysts and knowledge managers.

Capabilities you can develop
- Competence and learning systems
- People engagement and inclusion
- Human-capital reporting and workforce insight

This chapter contains 7 course pathways. The detailed course profiles follow on the next page.

Chapter 05

Human Resources Course profiles 1

Courses 1 to 6 of 7. Click an underlined title for the current course page.

Cognicert Human Resources Analytics Professional Course

Interpret workforce metrics, analyse human-capital reporting data and turn findings into informed HR decisions.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

ISO 30401

Develop practical capabilities in knowledge management, including knowledge needs, sharing processes and organisational learning.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Cognicert Training Professional Course

Identify competence needs, plan people-development activities and evaluate whether training supports workplace performance.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

ISO 10018 People Engagement Professional Course

Apply people engagement techniques to competence, participation and quality culture and use the results to inform workplace decisions.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

ISO 30409

Develop practical capabilities in workforce planning, including workforce demand, capability gaps and planning actions.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 30414

Develop practical capabilities in human capital reporting, including workforce metrics, disclosure evidence and data quality.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 05

Human Resources Course profiles 2

Courses 7 to 7 of 7. Click an underlined title for the current course page.

ISO 30415

Develop practical capabilities in diversity and inclusion, including inclusive policies, participation and measurable improvement.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 06

Information Security and Data Privacy

Develop governance, risk, assurance and incident capabilities for information, cyber and privacy programmes.

Who this pathway serves
Security managers, privacy professionals, IT governance teams and auditors.

Capabilities you can develop
- Information-security management systems
- Cybersecurity and incident response
- Privacy governance, cloud and AI controls

This chapter contains 7 course pathways. The detailed course profiles follow on the next page.

Chapter 06

Information Security and Data Privacy Course profiles 1

Courses 1 to 6 of 7. Click an underlined title for the current course page.

Cognicert ISO 27032 Cybersecurity Professional Course

Apply cybersecurity techniques to threats, risk controls and coordinated security responses and use the results to inform workplace decisions.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert ISO 38500:2015 IT Governance Professional Course

Apply IT governance techniques to IT responsibilities, strategic decisions and performance oversight and use the results to inform workplace decisions.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

ISO/IEC 27001

Understand information security management system requirements, risk assessment, risk treatment and audit evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 27017

Develop practical capabilities in cloud security, including cloud responsibilities, security controls and risk treatment.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO/IEC 27100

Develop practical capabilities in cybersecurity governance, including cybersecurity concepts, risk controls and improvement priorities.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 27701

Develop practical capabilities in privacy information management, including privacy risks, responsibilities and control evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 06

Information Security and Data Privacy Course profiles 2

Courses 7 to 7 of 7. Click an underlined title for the current course page.

ISO 42001

Understand artificial intelligence management system requirements, governance, risk, responsibilities and assurance evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 07

Maritime

Support safer ships, secure ports and effective ship-shore management through recognised maritime practices.

Who this pathway serves
DPA personnel, ship and port security officers, maritime auditors and crew managers.

Capabilities you can develop
- ISM and ISPS responsibilities
- Ship-shore assurance and security
- Crew, welfare and operational compliance

This chapter contains 6 course pathways. The detailed course profiles follow on the next page.

Chapter 07

Maritime Course profiles

Courses 1 to 6 of 6. Click an underlined title for the current course page.

Cognicert Crew Management Professional Course

Apply crew-management requirements to recruitment, employment conditions, training and seafarer welfare.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Designated Person Ashore Course

Monitor ship safety and pollution-prevention arrangements, connect ship and shore teams, and support ISM implementation.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

ISM Code

Compare training levels, study options and course details in one place.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISPS Code

Compare training levels, study options and course details in one place.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Cognicert Ship Security Officer Course

Assess ship-security risks, support security-plan implementation and coordinate inspections, drills and reporting.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Port Facility Security Officer

Assess port-facility security risks, support security-plan implementation and coordinate drills, records and response arrangements.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Chapter 08

Quality Management

Build systems that deliver consistent outputs, reliable evidence and sustained improvement across sectors.

Who this pathway serves
Quality managers, auditors, laboratory professionals, engineers and improvement leaders.

Capabilities you can develop
- Quality-system implementation and audit
- Laboratory and conformity-assessment competence
- Root cause, assurance and sector-specific controls

This chapter contains 25 course pathways. The detailed course profiles follow on the next page.

Chapter 08

Quality Management Course profiles 1

Courses 1 to 6 of 25. Click an underlined title for the current course page.

Cognicert Chemical Management Professional Course

Identify chemical hazards, organise safe handling and storage, and prepare controls for spills and waste.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

ISO 13485

Understand medical device quality management system requirements, documented processes, risk and audit evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 15288

Develop practical capabilities in systems engineering quality, including lifecycle processes, quality assurance and engineering evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 17020

Understand inspection competence, impartiality, inspection methods, reporting and consistent operation for inspection bodies.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 17043

Understand proficiency-testing programme design, participant results, statistical evaluation, competence and impartiality for proficiency-testing providers.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 20252

Develop practical capabilities in market and opinion research quality, including research processes, data integrity and service-quality controls.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 08

Quality Management Course profiles 2

Courses 7 to 12 of 25. Click an underlined title for the current course page.

Cognicert Pharmaceutical GMP Professional

Apply pharmaceutical GMP controls to materials, manufacturing records, validation, laboratory testing and product release.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert QA / QC Manager Course

Prepare quality and inspection plans, apply sampling controls and use process data to investigate nonconformities.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Quality Assurance Engineer Course

Apply engineering quality controls, evaluate reliability and connect lifecycle processes to quality assurance.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Quality Management Professional

Organise quality processes, analyse performance and investigate errors to support corrective action and improvement.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Root Cause Analysis Professional Course

Investigate failures, distinguish causes from symptoms and develop corrective actions supported by evidence.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

ISO 15189

Understand medical-laboratory quality and competence, pre-examination, examination and post-examination processes, and patient-focused risk for medical laboratories.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 08

Quality Management Course profiles 3

Courses 13 to 18 of 25. Click an underlined title for the current course page.

ISO 17021

Understand certification-body impartiality, competence, audit processes and certification decisions for management-system certification bodies.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 17024

Understand personnel-certification schemes, candidate assessment, examination processes, impartiality and certification decisions for certification of persons.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 17025

Understand laboratory competence, method verification and validation, measurement traceability, quality assurance and reporting for testing and calibration laboratories.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 17065

Understand certification schemes, evaluation, independent review, certification decisions and surveillance for product, process and service certification bodies.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 19345

Develop practical capabilities in pipeline integrity management, including integrity risks, maintenance controls and performance evaluation.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 19443

Develop practical capabilities in nuclear-sector supplier quality, including safety culture, supply-chain quality and control evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 08

Quality Management Course profiles 4

Courses 19 to 24 of 25. Click an underlined title for the current course page.

ISO 20000

Develop practical capabilities in IT service management, including service processes, responsibilities and performance evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 20387

Understand biobank competence, impartiality, biological-material handling, associated data, quality controls and consistent operation for biobanking.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 21001

Develop practical capabilities in educational organisation management, including learner needs, service processes and improvement evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 29001

Develop practical capabilities in oil and gas quality management, including sector-specific quality controls, supply-chain risks and audit evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 56001

Develop practical capabilities in innovation management, including innovation processes, opportunities and performance evaluation.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 9001

Understand quality management system requirements, process performance, customer focus and audit evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 08

Quality Management Course profiles 5

Courses 25 to 25 of 25. Click an underlined title for the current course page.

ISO 9001:2026 Transition Course

Identify changes covered in the ISO 9001:2026 transition programme and plan updates to your quality management system.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Chapter 09

Security

Develop operational, information, privacy and supply-chain security capability across complex environments.

Who this pathway serves
Security managers, operations leaders, maritime security teams and assurance professionals.

Capabilities you can develop
- Security operations and risk
- Cyber, cloud and privacy safeguards
- Private, maritime and supply-chain security

This chapter contains 13 course pathways. The detailed course profiles follow on the next page.

Chapter 09

Security Course profiles 1

Courses 1 to 6 of 13. Click an underlined title for the current course page.

ISO 18788

Develop practical capabilities in security operations management, including operational risks, responsibilities and control evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Cognicert ISO 27032 Cybersecurity Professional Course

Apply cybersecurity techniques to threats, risk controls and coordinated security responses and use the results to inform workplace decisions.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

ISO 28007

Develop practical capabilities in private maritime security, including security operations, risk controls and service assurance.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Cognicert ISO 38500:2015 IT Governance Professional Course

Apply IT governance techniques to IT responsibilities, strategic decisions and performance oversight and use the results to inform workplace decisions.

Best for Practitioners developing specialist capability

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Private Ship Security Manager Course

Plan private maritime security services, assess operational risks and coordinate personnel, controls and reporting.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Cognicert Security Operations Manager Course

Assess security risks, coordinate operational responsibilities and review the effectiveness of security controls.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now

Chapter 09

Security Course profiles 2

Courses 7 to 12 of 13. Click an underlined title for the current course page.

ISO 14298

Develop practical capabilities in security printing, including printing security risks, operational controls and assurance evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO/IEC 27001

Understand information security management system requirements, risk assessment, risk treatment and audit evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 27017

Develop practical capabilities in cloud security, including cloud responsibilities, security controls and risk treatment.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO/IEC 27100

Develop practical capabilities in cybersecurity governance, including cybersecurity concepts, risk controls and improvement priorities.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 27701

Develop practical capabilities in privacy information management, including privacy risks, responsibilities and control evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

ISO 28000

Develop practical capabilities in supply-chain security, including security risks, protective measures and assurance evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 09

Security Course profiles 3

Courses 13 to 13 of 13. Click an underlined title for the current course page.

ISO 42001

Understand artificial intelligence management system requirements, governance, risk, responsibilities and assurance evidence.

Best for Professionals comparing role and level options

Live online | Self-study | Classroom | Onsite | 1–5 days | Course details | Enrol now

Chapter 10

Supply Chain

Improve supplier, logistics, procurement and distribution decisions across connected value chains.

Who this pathway serves
Supply-chain managers, procurement teams, logistics professionals and business-development leaders.

Capabilities you can develop
- Supplier assurance and contracting
- Logistics, distribution and transport
- Continuity, security and collaborative relationships

This chapter contains 13 course pathways. The detailed course profiles follow on the next page.

Chapter 10

Supply Chain Course profiles 1

Courses 1 to 6 of 13. Click an underlined title for the current course page.

Agricultural Operations and Supply Chain Manager Course

Plan agricultural supply chains, coordinate suppliers and improve handling, storage and transport decisions.

Best for Managers and operational role holders

Live online | Self-study | Classroom | Onsite | Exam included | Course details | Enrol now
